How does this year deliver your curriculum intent?

Students following this scheme of learning are both recapping key material from years 7 and 8, to ensure the knowledge and skills are secure and they are able to reason with the content and also developing new knowledge across all of the mathematical strands. The focus of the year is on number and algebra work and building on the fluency they already have within previous learning. Within this year, students are shown mathematics in unfamiliar contexts that are relevant to the real world and develop knowledge that will be applicable across multiple different curriculum areas.
